Upgrading IQ Panel 2 firmware using Patchtag

The latest (as of Feb. 2025) IQ panel 2 firmware version is 2.8.1

If your system's current firmware version is below 2.5.3 you need to update it to 2.5.3 using *Patchtag* before updating to the newest version.

1. Make sure that the panel is connected to WiFi
2. Slide down on the screen
3. Click **Settings**
4. Click **Advanced settings**
5. Enter the Installer Code (the default is 1111)
6. Click **Upgrade software**
7. Click **Patch Tag**
8. Enter the patch "*iqpanel2.5.3*" Click OK
9. Click **Upgrade Using Network**

The panel will restart after the download and the installation is complete. Don't use the system while it is updating.
