

Find the firmware version of a 2GIG GC3

The firmware version of a 2GIG GC3 can be found locally using the panel.

The firmware version can also be found and requested remotely using the Partner Portal and MobileTech app. For more information about remotely finding the firmware version, see [Find or request the firmware version of a panel](#).

To find the firmware version of a 2GIG GC3 using the control panel:

1. On the home screen, tap **System Info and Usage**.
2. Tap **System Info**. The firmware version displays.
