

Mount an ADC-CSVR126 to a rack

The ADC-CSVR126 can be mounted to a standard server rack using the ADC-RME101 rack mount kit (sold separately). The rack mounts are designed to fit into a 1U (rack unit) area.

Note: A rack unit is 1.75 inches/44.45 millimeters tall. Width and depth can vary.

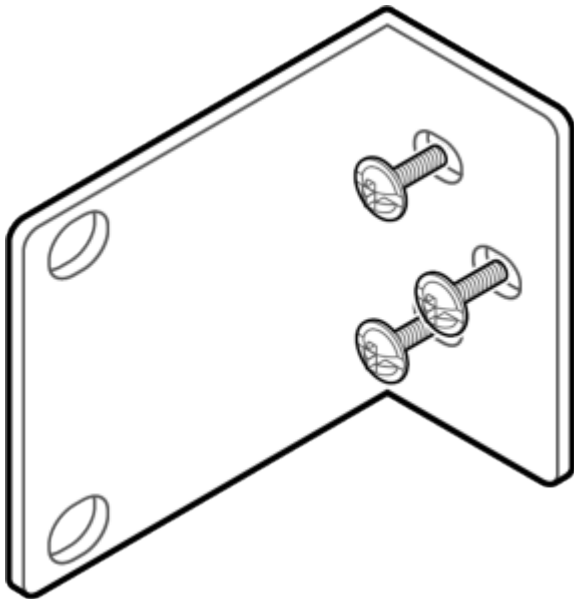

The ADC-RME101 is available for purchase on the Partner Portal.

In the box

- Mounting brackets (x2 — one for each side)
- Screws (x6 — three for each bracket)

Required hardware

- ADC-CSVR126
- ADC-RME101
- Standard server rack
- Server rack screws

To mount the ADC-CSVR126 to a rack:

Note: The brackets are identical and can be attached to either side.

1. Line up the three small holes on the mounting bracket with one side of the ADC-CSVR126.
2. Using the included screws, attach the bracket to the ADC-CSVR126.
3. Repeat the previous steps on the opposite side of the ADC-CSVR126.
4. Using server rack screws, attach the ADC-CSVR126 to each side of the server rack.
