How to add a Geo Device to your account

Your phone can be configured to automate home settings and initiate additional notifications based on your location relative to your home, office, or other location.

Enabling Geo-Services in the app will add your phone to your account as a Geo-Device.

To enable your phone as a Geo Device using app:

1. Log into the app.
2. Tap **More** (at the bottom right)
3. Tap **App Settings**.
4. Tap **Location Services**.
5. Tap the *Location Services* toggle switch to the **ON** position. This enables Location Services on your device and adds the device to the website as a Geo-Device.

Note: Use the following steps for each device.
